SCHEDULE A

RECOMMENDATIONS FOR DETERMINING THE TOTAL NUMBER OF DS200 SCANNERS & AUTOMARK BALLOT MARKING DEVICES FOR USE AT ELECTIONS

The Nassau County Board of Elections currently recommends that Villages, School Districts, and Special Districts rent one (1) DS200 for every two thousand five hundred (2,500) voters per polling place/location that they believe will be casting ballots in their election. This number is recommended due to the capacity of the ballot tote bins currently used by the Nassau County Board of Elections as well as the speed with which ballots are scanned, tabulated, and cast by the DS200. The Board of Elections recommends that the Village, School District, or Special District review voter turnout by polling place / location and by year to properly anticipate and estimate what the voter turnout will be for the election in question to determine the total number of machines necessary to be rented. Additionally, the Board recommends that, whenever possible and where machines are not specific to particular voter districts within a polling place, multiple machines be made available at each polling place / location to prevent the need to utilize the emergency ballot bin for casting votes in the event of a ballot jam or machine breakdown.

The Nassau County Board of Elections currently recommends that Villages, School Districts, and Special Districts rent one (1) AutoMark ballot marking device for every polling place / location that is utilized in their election.

The recommendations above do not preclude Villages, School Districts, or Special Districts from renting more or less DS200 scanners or AutoMark ballot marking devices, and the Board of Elections will make as many machines available to each Village, School, or Special District as possible, barring the Board's inability to do so due to its requirements in administering elections under the Constitution of the United States of America, the New York State Constitution and the Election Law of the State of New York.
